Apr 15, 2013

RRC Rules Coordinator  
TX

Dear Coordinator,

Please make the cementing/casing rules as strong as possible to protect groundwater.

Waste injection can contaminate aquifers and even trigger earthquakes.

Please adopt stricter standards for the casing of injection wells and require more detailed surveying and plugging of nearby wells to protect water supplies and prevent waste water from escaping.

We only have so much useable water on this planet. Why wouldn't everyone want to protect it?

Sincerely,

Julie Luton
